PROFESSIONAL SUMMARY

Bachelor of Science in Computer Science and Frontend engineer with practical experience supporting production systems, troubleshooting user-facing issues, and working with cross-functional teams. Proven ability to diagnose problems, manage deployments, and maintain configuration and asset records in fast-paced environments. Eager to apply technical support, network fundamentals, and systems-administration practices to an IT Officer role.

EDUCATION

Federal University of Lafia.

Nov 2024

Bachelor of Science

Course: Computer Science

RELEVANT EXPERIENCE

O2 Innovation Lab

Sept 2023 – Feb 2024

Information Technology Intern

- Supported day-to-day IT operations, including system setup, troubleshooting, and user assistance.
- Assisted with network administration tasks such as internet connectivity checks and device configuration.
- Helped manage user access, software installations, and system updates.
- Provided technical support during internal projects and system upgrades.
- Documented IT procedures and assisted in maintaining IT policies and best practices.

Osmovic Media

April 2024 – Dec 2024

Frontend Developer

- Supported production deployments and resolved user-reported issues for 3+ client projects, diagnosing frontend and integration faults to restore service quickly.
- Implemented SSR/SSG and optimized build/deployment workflows to improve reliability and reduce downtime.
- Collaborated with backend engineers and QA on authentication flows, error handling, and API resilience, contributing to stable cross-team operations.

Harley Innovation Hub

March 2025 – Dec 2025

IT Officer

- Installed, configured, and maintained computer systems, printers, and network devices across the hub.
- Provided first- and second-level technical support to staff, resolving hardware, software, and connectivity issues efficiently.
- Managed user accounts, system access rights, and permissions while ensuring data confidentiality.
- Monitored system performance, implemented backup routines, and supported data recovery processes.
- Maintained IT asset inventory, software licenses, and documentation.
- Assisted with IT infrastructure upgrades and liaised with external vendors for technical services.

SKILLS

- Strong analytical and problem-solving skills
- Excellent communication and user-support ability
- High integrity and respect for data confidentiality
- Ability to manage multiple IT tasks independently
- Proactive and detail-oriented
